

International Society for  
Mycotoxicology

**ISM Conference 2009**

Global discussion forum on:

**Worldwide Mycotoxin Reduction  
in Food and Feed Chains**

1st Announcement

9-11 September 2009

Tulln/Vienna, Austria

**CONFERENCE SESSIONS:**

1. Pre-harvest mycotoxin reduction:
  - Plant resistance and optimizing fungicide use
  - Biocontrol approaches
  - Predictive models
2. Post-harvest mycotoxin reduction:
  - Storage handling practices
  - Preservatives and potentiators
  - Food/feed processing for mycotoxin reduction
3. Bioavailability and detoxification of mycotoxins
  - Mycotoxin detoxifying agents for feed/food decontamination
  - Microbial degradation
  - Reducing bioavailability of mycotoxins
4. Advanced technologies to reduce and detect toxigenic fungi and mycotoxins
  - Biodiversity of fungi and novel diagnostic tools
  - Prevention methods based on novel molecular principles
  - Fungal and plant genomics
  - Rapid and advanced tools for mycotoxin analysis
  - From target analysis to metabolomics
