

FIRST ANNOUNCEMENT

3rd ASM *joint* MYTOX-SOUTH CONFERENCE

6 – 9 September, 2020

Stellenbosch, SOUTH AFRICA

The **African Society of Mycotoxicology (ASM)** together with **MYTOX-SOUTH** is proud to announce the **3rd African Symposium on Mycotoxicology (ASM) joint MYTOX-SOUTH Conference** to take place from 6 to 9 September, 2020 in Stellenbosch, South Africa.

The perpetual co-occurrence of mycotoxins contaminating food & feed crops represents a significant food safety concern in the world & especially Africa. Despite local & international research efforts, Africa & many other developing countries, are plagued by mycotoxigenic fungi & their mycotoxins due to the frequency, complexity & inconsistent occurrence as a result of variable crop production & storage conditions.

This high-level conference will be a platform for academic exchange between researchers, government & industry. It aims to strengthen the global knowledge on mycotoxins, extend the cooperative network, promote the sharing & development of mycotoxin management technologies & strategies. Therefore, on behalf **ASM** and **MYTOX-SOUTH**, we welcome all delegates and look forward to your participation in the upcoming conference.

Prof. Sheila Okoth & Prof. Sarah De Saeger
President of **ASM** & Coordinator **MYTOX-SOUTH**

ASM - MYTOX-SOUTH STEERING COMMITTEE

Prof. H. Hassan-Wassef (Egypt) - ASM Vice president
